Hongkong Tides.

The Tide Table given below has been compiled by the Nautical Almanae Office in London from the result of the analysis of observations taken by means of an Automatic tide-recording machine in the Water Police Basin at Tsim Sha Tsui during the years 1887-8-9.

The zero of the table is Low Water Ordinary Spring Tides, which has been found to be 2 feet below mean sea level. To obtain the depth of water on the tide gange at the Victoria Naval Yard add 5 ft. 7 in., and on the gange at Larnone Dook. Aberdeen, add 72 to the the hands given in the table.
